CALAMOS PROFILE

- Headquartered in Naperville, Illinois with additional offices in New York and London
- Majority family/employee owned, publicly quoted business
- Experience dating to the 1970s
- Total Assets^ of $27.5 Billion
- 74 investment professionals
- Global client base
- Focused strategy set

^ Total Assets includes assets under management as well as $844 million for which the company provides model portfolio design and oversight.

A non-U.S. all-cap growth equity strategy that seeks to invest in the common stocks of growth companies based outside the United States and seeks to outperform the MSCI ACWI ex-U.S. Growth Index over a full market cycle.

Key Differentiators

- In-depth capital structure analysis
- Rigorous top-down and fundamental analysis
- High active share, high relative growth focus
- Team approach to management

Calamos Investment Process

Our portfolio construction incorporates top-down and bottom-up analysis. Top-down considerations focus on the global macroeconomic environment, sectors and the identification of long-term secular themes that we believe will influence growth opportunities for decades to come. In our bottom-up research, we first determine the intrinsic value of the company and then utilize quantitative and qualitative analysis to value the securities within the company's capital structure. Investment candidates emerge from the intersection of our top-down and bottom-up considerations. These investments are vetted more extensively within the context of the overall portfolio. Continual monitoring and risk management analysis ensure that the strategy maintains appropriate diversification and risk/reward characteristics.

Past performance does not guarantee or indicate future results. Current performance may be lower or higher than the performance quoted. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.

The results portrayed on the preceding pages are for the Calamos International Growth Composite. Representative holdings and portfolio characteristics are specific only to the portfolio shown at that point in time. Other portfolios will vary in composition, characteristics, and will experience different investment results. The representative portfolio shown has been selected by the advisor based on account characteristics that the advisor feels accurately represents the investment strategy as a whole.

Returns presented reflect the Calamos International Growth Composite, which is an actively managed composite primarily investing in common stocks issued by companies outside the United States. The composite includes all fully discretionary fee-paying accounts. Accounts valued at less than $500,000 are not included. All returns are net of commission and other similar fees charged on securities transactions and include reinvestment of net realized gains and interest.

Fees include the investment advisory fee charge by Calamos Advisors LLC. Returns greater than 12 months are annualized. Chart Data Sources: Mellon Analytical Solutions LLC and Calamos Advisors LLC.

The **MSCI ACWI ex-U.S. Growth Index** is a free float-adjusted market capitalization weighted index that is designed to measure the growth equity market performance of developed and emerging markets, excluding the United States. The index is calculated on a total return basis, which includes reinvestment of gross dividends before deduction of withholding taxes. Unmanaged index returns assume reinvestment of any and all distributions and do not reflect any fees, expenses, or sales charges. Investors cannot invest directly in an index.

The information in this report should not be considered a recommendation to purchase or sell any particular security. There is not assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent the account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.
