

CALAMOS® INVESTMENT TRUST

Supplement dated July 1, 2016 to the CALAMOS® FAMILY OF FUNDS Summary Prospectuses for Class A, B and C and Class I and R of Calamos Focus Growth Fund, both dated February 29, 2016, the Summary Prospectuses for Class A and C and Class I and R of Calamos Long/Short Fund, both dated February 29, 2016, the Prospectuses for Class A, B and C and Class I and R, both dated February 29, 2016, as supplemented on March 14, 2016 and on June 10, 2016 and the Statement of Additional Information dated February 29, 2016, as supplemented on March 14, 2016 and on June 10, 2016

The Board of Trustees (“Board”) of Calamos Investment Trust (“Trust”) has approved a proposal to merge each Target Fund (as defined below) with and into the corresponding Acquiring Fund (as defined below) listed in the table below, each of which is a series of the Trust (each, a “Reorganization” and collectively, the “Reorganizations”). Each Reorganization is expected to be a tax-free reorganization for U.S. federal income tax purposes.

<u>Target Fund</u>	<u>Acquiring Fund</u>
Calamos Focus Growth Fund	Calamos Growth Fund
Calamos Long/Short Fund	Calamos Phineus Long/Short Fund

Each Reorganization identified above is subject to certain conditions, including approval by shareholders of the applicable Target Fund.

With respect to each Reorganization, if the Target Fund’s shareholders approve the Reorganization, the Target Fund will transfer all of its assets and liabilities to the Acquiring Fund in exchange for Acquiring Fund shares of equal value. These Acquiring Fund shares will then be distributed to Target Fund shareholders and the Target Fund will be terminated. As a result of these transactions, Target Fund shareholders will become shareholders of the Acquiring Fund and will cease to be shareholders of the Target Fund. Each Target Fund shareholder will receive Acquiring Fund shares with a total value equal to the total value of that shareholder’s Target Fund shares immediately prior to the closing of the Reorganization.

It is currently anticipated that proxy materials regarding the Reorganizations will be distributed to shareholders of the Target Funds in August 2016, and that a special meeting of each Target Fund’s shareholders to consider the Reorganizations will be held in September 2016. If the required approval is obtained, it is anticipated that the Reorganizations will be consummated shortly after the special shareholder meeting. The consummation of one Reorganization will not be subject to the consummation or approval of the other.

Additional information about both Reorganization, as well as information about each Acquiring Fund, will be distributed to shareholders of each Target Fund in the form of a Prospectus/Proxy Statement.

Please retain this supplement for future reference

Summary Prospectus

Calamos Long/Short Fund

NASDAQ Symbol: CALSX – Class A CCLSX – Class C

CALAMOS®

Before you invest, you may want to review the Fund's prospectus and statement of additional information, which contain more information about the Fund and its risks. You can find the Fund's prospectus, statement of additional information and other information about the Fund online at <http://fundinvestor.calamos.com/FundLit>. You can also get this information at no cost by calling 800.582.6959 or by sending an e-mail request to prospectus@calamos.com. The current prospectus and statement of additional information, both dated February 29, 2016 (and as each may be amended or supplemented), and the financial statements included in the Fund's report to shareholders, dated October 31, 2015, are incorporated by reference into this summary prospectus.

Investment Objective

Calamos Long/Short Fund's investment objective is long term capital appreciation.

Fees and Expenses of the Fund

The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Calamos Funds. More information about these and other discounts is available from your financial professional and under "Fund Facts — What classes of shares do the Funds offer?" on page 106 of the Fund's prospectus and "Share Classes and Pricing of Shares" on page 61 of the Fund's statement of additional information.

Shareholder Fees (fees paid directly from your investment):	CLASS A	CLASS C
	Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.75%
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of the redemption price or offering price)	None	1.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):	CLASS A	CLASS C
	Management Fees	1.25%
Distribution and/or Service Fees (12b-1)	0.25%	1.00%
Other Expenses	0.28%	0.28%
Dividend Expense on Short Positions	0.48%	0.48%
Acquired Fund Operating Expenses ¹	0.04%	0.04%
Total Annual Fund Operating Expenses	2.30%	3.05%

¹ "Acquired Fund Operating Expenses" include certain expenses incurred in connection with the Fund's investment in Fidelity Prime Money Market Fund, SPDR S&P 500 ETF Trust and SPDR S&P MIDCAP 400 ETF Trust.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of the reflected time periods. The example also assumes that your investment has a 5% return each year, that all dividends and capital gain distributions are reinvested, that you pay a maximum initial or contingent deferred sales charge and that the Fund's operating expenses remain the same. Although your actual performance and costs may be higher or lower, based on these assumptions, your costs would be:

	REDEMPTION		NO REDEMPTION	
	A	C	A	C
1 Year	697	408	697	308
3 Years	1,159	942	1,159	942
5 Years	1,647	1,601	1,647	1,601
10 Years	2,985	3,365	2,985	3,365

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. During the Fund's most recent fiscal year, the Fund's portfolio turnover rate was 154.9% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by taking long and short positions in equity securities (including common and preferred stock) primarily of large and mid-cap U.S. companies. The Fund's investment adviser generally defines a large cap company to have a market capitalization in excess of \$25 billion and a mid-sized company to have a market capitalization between \$1 billion and \$25 billion. However, the Fund may invest in companies of any size and market capitalization. The Fund may invest up to 40% of its net assets in foreign securities. The Fund may also invest in fixed income securities of varying maturities and cash and cash equivalents.

Calamos Long/Short Fund

The Fund seeks to outperform the equity markets while providing less volatility through active stock selection and by adjusting market exposures within its portfolio. The Fund seeks to accomplish this by taking long positions in companies that are expected to outperform the equity markets, while taking short positions in companies that are expected to underperform the equity markets and for hedging purposes. A long position arises where the Fund holds a security in its portfolio. The Fund will have a short position where it sells a security it does not own by delivery of a borrowed security. Although the Fund intends to maintain an overall long position in its portfolio, the Fund may maintain significant short positions and, in certain circumstances these short positions may approach the size of overall long positions. The Fund may maintain long and short positions through the use of derivative instruments such as options, futures and forward contracts. The Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis and may regularly engage in short sales and borrowings for investment purposes.

As market volatility increases, the Fund's portfolio may turnover more frequently. The Fund may maintain cash and cash equivalents, without limitation, when the Fund's investment adviser determines that opportunities for investing are unattractive.

Principal Risks

An investment in the Fund is subject to risks, and you could lose money on your investment in the Fund. There can be no assurance that the Fund will achieve its investment objective. The risks associated with an investment in the Fund can increase during times of significant market volatility. Under certain conditions, even if the value of the Fund's long positions are rising, this could be offset by declining values of the Fund's short positions. Conversely, it is possible that rising values of the Fund's short positions could be offset by declining values of the Fund's long positions. In either scenario the Fund may experience losses. In a market where the value of both the Fund's long and short positions are declining, the Fund may experience substantial losses. Your investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund include:

- **Equity Securities Risk** — The securities markets are volatile, and the market prices of the Fund's securities may decline generally. The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions. If the market prices of the securities owned by the Fund fall, the value of your investment in the Fund will decline.
- **Short Sale Risk** — The Fund may incur a loss (without limit) as a result of a short sale if the market value of the borrowed security increases between the date of the short sale and the date the Fund replaces the security. The Fund may be unable to repurchase the borrowed security at a particular time or at an acceptable price.
- **Options Risk** — The Fund's ability to close out its position as a purchaser or seller of an over-the-counter or exchange-listed put or call option is dependent, in part, upon the liquidity of the option market. There are significant differences between the securities and options markets that could result in an imperfect correlation among these markets, causing a given transaction not to achieve its objectives. The Fund's ability to utilize options successfully will depend on the ability of the Fund's investment adviser to predict pertinent market movements, which cannot be assured.
- **Portfolio Selection Risk** — The value of your investment may decrease if the investment adviser's judgment about the attractiveness, value or market trends affecting a particular security, issuer, industry or sector or about market movements is incorrect.
- **Liquidity Risk** — Liquidity risk exists when particular investments are difficult to purchase or sell. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price.
- **Leveraging Risk** — Leverage is the potential for the Fund to participate in gains and losses on an amount that exceeds the Fund's investment. Leveraging risk is the risk that certain transactions of the Fund may give rise to leverage, causing the Fund to be more volatile and experience greater losses than if it had not been leveraged. The Fund's use of short sales and investments in derivatives subject the Fund to leveraging risk.
- **Portfolio Turnover Risk** — The portfolio managers may actively and frequently trade securities or other instruments in the Fund's portfolio to carry out its investment strategies. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses. Frequent and active trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.
- **Foreign Securities Risk** — Risks associated with investing in foreign securities include fluctuations in the exchange rates of foreign currencies that may affect the U.S. dollar value of a security, the possibility of substantial price volatility as a result of political and economic instability in the foreign country, less public information about issuers of securities, different securities regulation, different accounting, auditing and financial reporting standards and less liquidity than in U.S. markets
- **Growth Stock Risk** — Growth securities typically trade at higher multiples of current earnings than other securities and, therefore, may be more sensitive to changes in current or expected earnings than other equity securities and may be more volatile.
- **Small and Mid-Sized Company Risk** — Small and mid-sized company stocks have historically been subject to greater investment risk than large company stocks. The prices of small and mid-sized company stocks tend to be more volatile than prices of large company stocks.
- **Derivative Risks** — Derivatives are instruments, such as futures and forward foreign currency contracts, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments. Derivatives can be used for hedging (attempting to reduce risk by offsetting one investment position with another) or non-hedging purposes. Hedging with derivatives may increase expenses, and there is no guarantee that a hedging strategy will work. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments. In addition, derivative instruments are subject to counter party risk, meaning that the party who issues the derivatives may experience a significant credit event and may be unwilling or unable to make timely settlement payments or otherwise honor its obligations. Changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested.
- **Futures and Forward Contracts Risk** — Futures contracts provide for the future sale of sale by one party and purchase by another of a specific asset at a specific time and price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the options. Futures and forward contracts are subject I counter party risk, meaning that the party who issues the derivatives may experience a significant credit event and may be unwilling or unable to make timely settlement payments or otherwise honor its obligations.
- **Interest Rate Risk** — The value of fixed-income securities generally decreases in periods when interest rates are rising. In addition, interest rate changes typically have a greater effect on prices of longer-term fixed-income securities than shorter-term fixed-income securities. Recent events in the fixed-income market may expose the Fund to heightened interest rate risk and volatility.

Calamos Long/Short Fund

- **Credit Risk** — An issuer of a fixed-income security could be downgraded or default. If the Fund holds securities that have been downgraded, or that default on payment, the Fund's performance could be negatively affected.
- **Cash Holdings Risk** — To the extent the Fund holds cash positions, the Fund risks achieving lower returns and potential lost opportunities to participate in market appreciation which could negatively impact the Fund's performance and ability to achieve its investment objective.
- **Other Investment Companies (including ETFs) Risk** — Investments in the securities of other investment companies, including ETFs, may involve duplication of advisory fees and certain other expenses. Additionally, if the investment company or ETF fails to achieve its investment objective, the value of the Fund's investment will decline, adversely affecting the Fund's performance. In addition, closed end investment company and ETF shares potentially may trade at a discount or a premium and are subject to brokerage and other trading costs, which could result in greater expenses to the Fund. The Fund may also engage in short sales of the securities of other investment companies.

Fund Performance

The following bar chart and table indicate the risks of investing in the Fund by showing changes in the Fund's performance from calendar year to calendar year and how the Fund's average annual total returns compare with those of a broad measure of market performance. All returns include the reinvestment of dividends and distributions. As always, please note that the Fund's past performance (before and after taxes) cannot predict how it will perform in the future. Updated performance information is available at no cost by visiting www.calamos.com or by calling 800.582.6959.

CLASS A ANNUAL TOTAL RETURN FOR YEARS ENDED 12.31

Best Quarter: 3.32% (12.31.14)

Worst Quarter: -6.18% (9.30.15)

Average Annual Total Returns as of 12.31.15

The following table shows how the Fund's average annual performance (before and after taxes) for the one-year period ended December 31, 2015 and since the Fund's inception compared with broad measures of market performance. "Since Inception" returns shown for each index are returns since the inception of the Fund's Class A shares, or since the nearest subsequent month end when comparative index data is available only for full monthly periods. The after-tax returns show the impact of assumed federal income taxes on an investment in the Fund. Return "After Taxes on Distributions" shows the effect of taxable distributions, but assumes that you still hold the Fund shares at the end of the period and so do not have any taxable gain or loss on your investment. Return "After Taxes on Distributions and Sale of Fund Shares" shows the effect of taxable distributions and any taxable gain or loss that would be realized if the Fund shares were purchased at the beginning and sold at the end of the specified period.

The after-tax returns are shown only for Class A shares, and are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns for classes other than Class A will vary from returns shown for Class A. Return After Taxes on Distributions and Sale of Fund Shares may be higher than other returns for the same period due to a tax benefit of realizing a capital loss upon the sale of Fund shares.

AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED 12.31.15

	INCEPTION DATE OF CLASS	ONE YEAR	SINCE INCEPTION
Class A	6.3.13		
Load Adjusted Return Before Taxes		-8.59%	0.12%
Load Adjusted Return After Taxes on Distributions		-8.59%	-0.09%
Load Adjusted Return After Taxes on Distributions and Sale of Fund Shares		-4.86%	0.08%
Class C	6.3.13		
Load Adjusted Return Before Taxes		-5.56%	1.30%
HFRI Equity Hedge Index		-0.44%	3.26%
S&P 500 Index		1.38%	11.21%

The S&P 500 Index is generally considered to be representative of the U.S. stock market. The S&P 500 Index is provided to show how the Fund's performance compares with the returns of an index of securities similar to those in which the Fund invests.

Calamos Long/Short Fund

Investment Adviser

Calamos Advisors LLC

PORTFOLIO MANAGER/FUND TITLE (IF APPLICABLE)	PORTFOLIO MANAGER EXPERIENCE IN THE FUND	PRIMARY TITLE WITH INVESTMENT ADVISER
John P. Calamos, Sr. (President, Chairman)	since Fund's inception	Chief Executive Officer, Global Co-CIO
Michael Grant	since October 5, 2015	SVP, Sr. Co-Portfolio Manager

To Place Orders

Please contact your broker or other intermediary, or place your order directly:

U.S. Bancorp Fund Services, LLC

P.O. Box 701

Milwaukee, WI 53201

Phone: 800.582.6959

Transaction Policies

The Fund's shares are redeemable. In general, investors may purchase, redeem, or exchange Fund shares on any day the New York Stock Exchange is open by written request (to the address noted above), by wire transfer, by telephone (at the number noted above), or through a financial intermediary. Orders to buy and redeem shares are processed at the next net asset value to be calculated only on days when the New York Stock Exchange is open for regular trading.

Tax Information

The Fund's distributions will generally be taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
